Introduction

The mission of the Faculty of Medicine is to participate actively in the advancement of knowledge and mastery of skills for the improvement of Health care.

To achieve this mission, the Department of Pharmacology and Physiology is doing everything possible to train tomorrow's great researchers. A true incubator of the scientific elite, our Department offers its students weekly seminars where, throughout the year, experienced, national and international researchers present their most recent discoveries. We believe that it is essential to make our students aware of important research happening elsewhere in the world. To do this, we need the financial support of our partners.

Each year, the Department organizes the Gabriel L. Plaa Research Day, an event rich in discussions and knowledge exchange focused on intellectual stimulation. In this spirit, the existence of a forum for our graduate students and postdoctoral fellows to share their research experience is a central pedagogical element. Evaluated by a jury, they present the progress of their work to their peers, professors and staff members. The day ends with the awarding of prizes (Award of excellence and Best academic progress). Without the contribution of our generous partners, we would be unable to offer this day to our students free of charge and to give them attractive prizes. More than 200 people participated in the last edition and we want to continue to make this day a success.

2025-2026 Objective : 25 000 \$

We invite you to read our Partnership plan through the following pages to assess how your institution can benefit from a partnership with our Department.

Visibility

The Department of Pharmacology and Physiology has more than 100 faculty members on campus and in our seven affiliated research centers, as well as some 30 national and international guest speakers at our weekly seminars. It is also 45 postdoctoral fellows, 267 students enrolled in our graduate programs and 313 students enrolled in the bachelor's degree in biomedical sciences. Our Department also offers a window on the entire international community through our presence on various networks: [website](#), [LinkedIn](#). Our Partnership plan offers you the opportunity to position your institution with the scientific elite in the field of pharmacology, clinical pharmacology, physiology and biomedical engineering.

By adding your name to our Department, you are also seizing a unique opportunity to showcase your commitment to promoting graduate research and education. Come and interact directly with professors, researchers and clinicians from the Department as well as students and staff members on this fantastic networking opportunity with future graduates. Not only do we invite you to be at the forefront of the scientific scene, but be part of our Research Day by accepting to be a member of the jury.

You will find in the following pages the partnership options. Choose the one that suits you the best by completing the form on page 9.
